READY FOR A BETTER SHOWER SOLUTION . . . *that's not fiberglass or tile?*

Durability. Design. Low maintenance. Mincey panels and pans outperform other commonly used materials in multifamily projects. Made from solid cast marble, they're groutless, non-porous, and designed to impress.

CAST MARBLE: THE BETTER ALTERNATIVE

Durable enough for hotels.

Cast marble has been a standard in hotels for decades. Strong enough to withstand hundreds of guests a year, it will no doubt stand up to the demands of your tenants.

Looks like new. Tenant after tenant.

Thanks to their groutless, non-porous surfaces, Mincey showers resist mold, mildew, and stains. Cleaning is a breeze between tenants. Plus, your showers stay looking like new for years to come.

Uncompromising design.

Ditch the plastic look of fiberglass and the moldy grout that comes with tile. Choose from tile-like patterns, unique shapes, and textured finishes. Patterns you just can't get with other materials.

Made in the USA

All Mincey panels and pans are designed and manufactured in our state-of-the-art facility in Gainesville, Georgia and then shipped direct to your jobsite.
