

Small Shipment Delivery Information

When Mincey Marble has produced your order and it is ready for shipment, if the order was packaged in a small crate, it will ship LTL (less than a load) via FedEx Freight. As a rule, these shipments are sent in a 53' van and will be unloaded and reloaded at several terminals before it arrives at the jobsite. The typical transit time is 3 - 5 business days, depending on the provided delivery location.

The rates for an LTL shipment are based on the origin and destination zip codes, weight and dimensions of the product being shipped. LTL trucks offer lift-gate delivery if your jobsite doesn't have off-loading capabilities. The driver will lower the crate(s) to the ground; however, you are responsible for relocating it once it has been offloaded.

Moving the crate will require a pallet jack and a 5,000 lb. capacity forklift with 48" or 72" forks to offload. The required fork lengths will be confirmed at the time of shipping.
